

PLATEMINUS™ V2

PLATEminus™ V2 is built with the same fully MOLLE compatible MOLLEminus platform as the original PLATEminus™. The Plate 2 provides the users with built in 6"x6" side plate pockets and a cummerbund. This provides fully modular load carriage capability but significantly reduces weight and bulk over traditional armor carriers. PLATEminus™ V2 is built to hold SAPI / ESAPI armored plates and has fully enclosed plate pockets which protect the plates. It provides maximum signature management by eliminating black plates or the need for additional "socks".

Weight	543**
Part #	MM-PLATE-2-Y-XX
Size	Small - 8.75" x 11.75" Medium - 9.5" x 12.5" Large - 10.125" x 13.25" Extra Large - 11" x 14"

BLUE FORCE GEAR®

PLATEMINUS™ V2

The PLATEminus™ Version 2 combines the low profile armor carrier of the PLATEminus and expands it into a full featured armor carrier capable of carrying side plates. The built in side plate pockets fit 6" x 6" plates while the main carrier is compatible with standard SAPI and ESAPI plates with or without backers. The armor plates are completely enclosed by the internal plate pockets - eliminating the need for additional "socks."

The MOLLEminus "holes and slots" saves significant weight and are fully MOLLE compatible for mounting magazine pouches, admin pouches, radios, or other MOLLE gear. The adjustable Ten-Speed cummerbund fits M4 magazines, trauma dressings, or other smaller items with no additional weight or pouches.

The shoulder straps are fully adjustable with the excess lengths able to be cut off for extreme weight savings. Two sections of hook and loop on each side holds cables and tubes secure. All materials are pattern matched for maximum signature reduction including the front loop fields for name tapes or unit IDs. A Tourniquet NOW!™ can be mounted on the bottom edge of the PLATEminus 2 to hold tourniquets out of the way but ambidextrously accessible.
