(57) **ABSTRACT**

A grenade pouch lid has a rim engagement feature, and the rim engagement feature is operable to secure the planar body to an object having a disc-shaped rim when the rim engagement feature is urged against the rim. The rim engagement feature may include at least two spaced apart elements defining a space therebetween for receiving the rim. The planar body may include a slot, the slot being operable to receive one end of a strap. The planar body may include a wedge shaped portion, the wedge-shaped portion being opposed to the rim engagement feature. The rim engagement feature and the rim may have the same radius. The planar body may cover the center of the rim when the planar body is secured to the object. The object having a disc-shaped rim may be a 40 mm grenade. A grenade pouch is also disclosed.
