LIGHTEN THE LOAD[®]

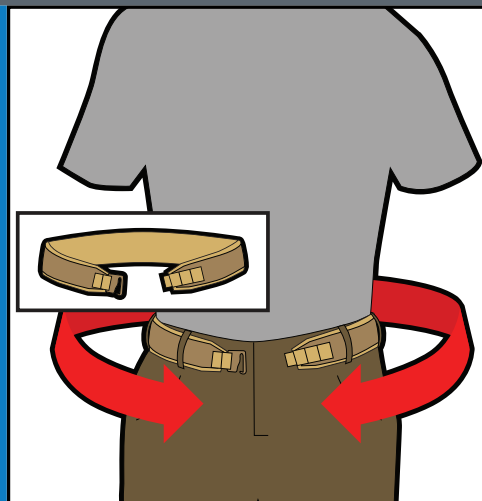

GRID™ BELT | NEXT GENERATION OF BATTLE BELTS

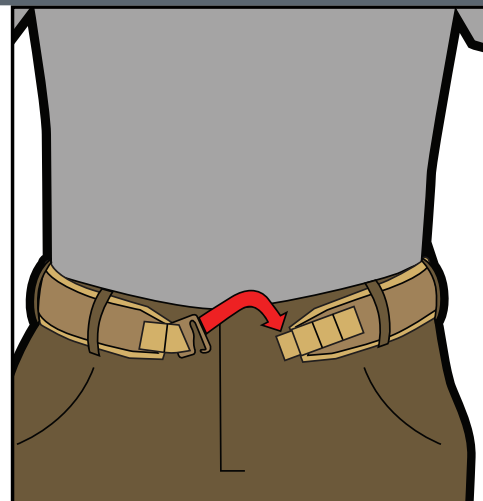

The GRID Belt is a streamlined, lighter adaptation of the CHLK Belt. By removing both tether loops and load-rated capabilities we've opened up additional belt real estate for the optimal placement of gear. This allows ground elements more space to work without unnecessary tether points impeding them, while still retaining the effectiveness and comfort that the belt was designed to provide. The GRID Belt also features an improved glove hanger, which is made from a custom-molded polymer for greater durability.
