MOLLE
Compatible

The M320 Holster is an ultralight holster for the M320 Grenade Launcher. The holster mounts to a 3 x 4 MOLLE field and can be mounted on the right side, also available in a left-handed version, with the grip to the rear or left side with the grip forward. The holster is an open top design with an adjustable cross strap allowing for use with any sighting system. The bungee loop can be placed around the grip for additional retention. A unique feature built into the M320 Holster is its ability to lay flat when not in use to save space inside a pack, bag, or arms room.
