

Always Better®

Water Resistant

Lightweight

MOLLE Compatible

PLATEminus™ V3 is built with the same fully MOLLE compatible MOLLEminus platform as the original PLATEminus™. The PLATEminus™ V3 provides the users with built-in 6"×6" side plate pockets and a cummerbund. This provides fully modular load carriage capability but significantly reduces weight and bulk over traditional armor carriers. PLATEminus™ V3 is built to hold SAPI / ESAPI armored plates and has fully enclosed plate pockets which protect the plates. It provides maximum signature management by eliminating black plates or the need for additional "socks".
