SWAT-T Pressure Device (1x)

PN: P-MED-TQ-4-BK

The Micro Trauma Kit NOW! - NANO is the smallest of the BFG MED medical kits. This mini trauma pouch holds the essential medical gear intended to stop the number one cause of traumatic death: bleeding! A true EDC first aid pouch that can easily be stowed in a pocket, briefcase, backpack, car door pocket, medical pack or any similar sized space.

Designed primarily for First Responders, the PRO version is equipped to bridge the time gap between injury and arrival of advanced medical providers. Paired with a tourniquet, the PRO kit allows for treatment of the most common life threatening traumatic injuries with a minimal amount of training. \*Proof of medical authorization required for purchase due to restricted medical contents\*
