

Always Better®

Lightweight

Heavy Duty

## INSTALLATION

1. Push wire loop through eyelets, loops, slots, or any other opening the wire fits

2. Pull the wire loop over the tooth, towards the sling

3. Pull the wire loop under the tooth to lock in place

The BFL (Belt Fed Loop) offers a loop-and-lock attachment system for securing the weapon sling to the rifle. Designed specifically for the SAW, M240, and the FN Minimi as the best front attachment hardware to resist melting from "going hot". The BFL's forged aluminum body is best combined with the Nomex front webbing found on the Vickers M249 SAW Sling or Vickers M240 Sling to farther resist heat. The Belt Fed Loop's nylon coated stainless steel wire loops through eyelets, slots and other attachment points, making it a quick and easy addition to most rifles.

Weight	14g
Part #	UWL-UL2-125-BK
Loop Size	3.5" loop
Features	
Fits up to 1.50" webbing	Fast assembly
Patent pending	
Materials	
Aircraft grade seven strand stainless steel cable	Forged Aluminum

BK

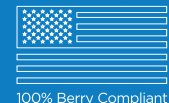

Black

\*Other colors available upon request \*\*Accessories not included
