

NEW PRODUCT OVERVIEW

BLUE FORCE GEAR® HUNTING SLING

The [Blue Force Gear](#) Hunting Sling, which utilizes the company's vast manufacturing experience with tactical weapon slings, elevates every hunting rifle, shotgun or modern sporting rifle with its revolutionary adjustability and advanced materials. This simple and fully adjustable sling is ready to attach to any standard sling swivel studs.

The Hunting Sling is made from the same military-grade Invista solution-dyed CORDURA® webbing used within all Blue Force Gear slings, and used by over 250,000 servicemen. The sling is colorfast to nearly eliminate fading and durable enough to withstand any conditions.

Designed as a completely captive sling, there is no “wrong” way to mount it, but it is recommended for the tightening motion to slide towards the buttstock. It's easy to use – unscrew the knurled bolt on the EX Swivel and insert the swivel stud, then tightly screw the bolt back in, repeat on other sling swivel stud, and the sling is ready for use. The nylon adjuster makes it easy to shorten or lengthen the sling to be versatile whether it is being used to securely carry a long gun or to quickly shoulder and fire without having to remove the sling.

Find technical specs and see a demonstration of *Blue Force Gear's* new Hunting Sling and other innovative products in booth 31209 at SHOT Show in Las Vegas from Jan. 17–20. Personal interviews with company leaders will be available to media.

About *Blue Force Gear*:

[Blue Force Gear](#) designs the best weapon slings and leads the lightweight equipment revolution with its [Ten-Speed® multi-use pouches](#). They also reinvented MOLLE to be the world's lightest with their [Helium Whisper® pouch](#) attachment system and high-performance laminate, [ULTRAcamp™](#). Unrivaled innovation and attention to detail set *Blue Force Gear* apart from others in the tactical equipment industry.
