

## NEW PRODUCT OVERVIEW

### **BLUE FORCE GEAR® KLAUX PLATE CARRIER**

[Blue Force Gear](#) showcases its latest evolution in its PLATEminus Plate Carriers line with the all-new KLAUX Plate Carrier. The KLAUX sets itself apart from other armor carrier systems currently available by using a patent-pending quick attach buckle. This distinct emergency-release system is built directly into the front attachment points of the vest. This allows the vest to immediately release and can easily be shed when the user pulls the release cable (conveniently hidden beneath the chin protector.)

The KLAUX Plate Carrier also greatly reduces reassembly time. Rather than spending up to 30 minutes – which is common practice for many competitors’ gear – most end users can reassemble the KLUAX Plate Carrier in as little as 30 seconds, which means that this carrier can easily be used in training where the user becomes familiar with the exact carrier they will be using in the field.

Find technical specs and see a demonstration of *Blue Force Gear’s* new KLAUX Plate Carrier and other innovative products in booth 31209 at SHOT Show in Las Vegas from Jan. 17–20. Personal interviews with company leaders will be available to media.

#### **About *Blue Force Gear*:**

[Blue Force Gear](#) designs the best weapon slings and leads the lightweight equipment revolution with its [Ten-Speed® multi-use pouches](#). They also reinvented MOLLE to be the world’s lightest with their [Helium Whisper® pouch](#) attachment system and high-performance laminate, [ULTRAcamp®](#). Unrivaled innovation and attention to detail set *Blue Force Gear* apart from others in the tactical equipment industry.
