

## NEW PRODUCT OVERVIEW

### **BLUE FORCE GEAR® MARCO® DISPENSER**

[Blue Force Gear's](#) Marking and Recognition Chemstick Organizer Dispenser – MARCO - is a more efficient, effective and compact way to carry marking lights for room clearing. With the MARCO dispenser, users can save critical time during preparation during pre-mission tasks by not having to unwrap, tape and bundle chem sticks.

The dispensers design makes it simple for users – simply open the Mylar package with the pre-loaded dispenser, insert the MARCO dispenser inside of the belt or MOLLE holster and proceed with the mission. The design prevents the accidental activation of a chem stick, which can cause unwanted light.

In addition to being used during missions, the MARCO dispenser also has valuable application to the hunting world when out in the field trailing downed game at night.

The 2-inch mini chem sticks deployed from the MARCO dispenser provide the equivalent light of a 4-inch chem stick as seen through Night Vision devices and are self illuminating, continuing to glow rain or shine.

Find technical specs and see a demonstration of *Blue Force Gear's* new MARCO Dispenser and other innovative products in booth 31209 at SHOT Show in Las Vegas from Jan. 17–20. Personal interviews with company leaders will be available to media.

#### **About *Blue Force Gear*:**

[Blue Force Gear](#) designs the best weapon slings and leads the lightweight equipment revolution with its [Ten-Speed® multi-use pouches](#).
