

NEW PRODUCT OVERVIEW

BLUE FORCE GEAR[®] ULTRAcamp[®] POCKET HOLSTER

The [Blue Force Gear](#) Pocket Holster is the company's first foray into the everyday carry (EDC) market. The manufacturer of battle-tested weapon slings and battle equipment has used its revolutionary field gear development experience to create the ULTRAcamp Pocket Holster.

Designed with *Blue Force Gear's* proprietary high-performance laminate called ULTRAcamp, the new EDC pocket holster exceeds military standard materials in tear and abrasion resistance while remaining versatile and ultra lightweight for the carrier. ULTRAcamp removes extra bulk while solidly securing and concealing a pocket pistol, creating the thinnest pocket holster available today.

By reducing the weight and bulk over a standard pocket holster, the ULTRAcamp Pocket Holster provides additional comfort to the carrier and protects both the weapon and interior of the pocket. The secure weapon positioning that the holster provides ensures safe and accurate grip and weapon removal from its pocket holster.

The *Blue Force Gear* ULTRAcamp Pocket Holster is available to fit the SIG SAUER[®] P238/938, KIMBER[®] MICRO, GLOCK[®] 42, and RUGER[®] LCP[®] / LCP2.

Find technical specs and see a demonstration of *Blue Force Gear's* new ULTRAcamp Pocket Holster and other innovative products in booth 31209 at SHOT Show in Las Vegas from Jan. 17–20. Personal interviews with company leaders will be available to media.

About *Blue Force Gear*:

[Blue Force Gear](#) designs the best weapon slings and leads the lightweight equipment revolution with its [Ten-Speed[®] multi-use pouches](#). They also reinvented MOLLE to be the world's lightest with their [Helium Whisper[®] pouch](#) attachment system and high-performance laminate, [ULTRAcamp[™]](#). Unrivaled innovation and attention to detail set *Blue Force Gear* apart from others in the tactical equipment industry.
