

Blue Force Gear Makes Additions to Growing Line of Tactical Pouches

Lightweight, Versatile Pouches

SAVANNAH, GA-July 8, 2016- Blue Force Gear® announced the addition of three new pouches to its growing product line of firearms accessories, each designed with focus on mission-critical essentials, including hydration and ammunition storage, all while remaining versatile and lightweight.

“Having customers in the SOF community, we realized we had some gaps in our line that needed to be filled,” says Stephen Hilliard, Director of Product Development. “These new pouches will bridge some of these gaps and give our end users options that are extremely lightweight, thoughtfully designed and built using their direct feedback.”

Performance and Usability

Included in the product additions, the Medium Dump Pouch is a larger dump pouch alternative to the company’s Ultralight Dump Pouch that is able to be stowed and was designed for extended overt use. This pouch includes a “fish trap” style flap at the top for immediate storage of magazines and other items, which provides additional security and allows items to be stowed in the pouch when going to prone or getting in or out of vehicles.

The Water Bottle Pouch was designed with focus on the importance of hydration during all kinds of missions. This lightweight pouch can hold a one-liter Nalgene® bottle or a one-quart canteen, which allows water to be held in a convenient, accessible location on a battle belt, vest, armor carrier or on the side of packs.

Designed to hold a 200-round M249 SAW drum, the SAW Pouch serves as a great all-around utility pouch. The pouch’s body is constructed of ULTRAcamp™, which allows the pouch to keep its shape better than ballistic nylon and also offers greater wear and abrasion resistance. This can be especially helpful when holding items with sharp edges or corners.

Pricing and Availability

The Medium Dump Pouch, Water Bottle Pouch and SAW Pouch are available now at www.blueforcegear.com. Pricing ranges from \$80 to \$104 per pouch.
