

PRODUCT SERIES LINE EXPANSION

***BLUE FORCE GEAR*[®] ANNOUNCES ADDITIONS TO ITS TEN-SPEED[®] POUCH SUITE**

[POOLER, GA, August 26, 2019—] [Blue Force Gear's](#) revolutionary Ten-Speed[®] magazine pouches have received several functional updates at the request of specialized end-users.

As our customers' needs evolved, we have added functional enhancements to our Ten-Speed line that include low-profile ULTRAcamp[®] pull-tabs to assist in magazine reinsertion, an increase in retention due to material orientation, and an extension of our Helium Whisper™ design, ULTRAcamp laminate backer that continues up the front of our M4 pouches. This additional material reinforces the lower edge, adds rigidity, and allows stacking of our pistol pouches, thanks to a single column of laser cut, MOLLE compatible slots.

“The enhancements made to our Ten-Speed line are fitting examples of what we strive for internally as a company – to exemplify our motto – Always Better™” said Stephen Hilliard, Director of Product Development for *Blue Force Gear*. Constructed using *Blue Force Gear's* proprietary ULTRAcamp laminate and signature reducing, color-matched printed elastic, the enhanced Ten-Speed pouch will first be available with its Helium Whisper, MOLLE compatible backer in Multicam, Coyote Brown, and Black. Other colorways and attachments will follow.

About Ten-Speed

Ten-Speed pouches are multipurpose magazine carriers that offer an ideal blend of speed and security. Built using military-grade elastic, an M4 pouch as an example, will securely contain a single M4 magazine or similar sized items, such as flashbangs, trauma dressing or a pair of pistol magazines in a pinch. When empty, the pouch lays completely flat, going unnoticed until needed, or offering a scalable option to your kit. The Helium Whisper attachment system is 26% lighter than our own legacy version, and is the lightest magazine pouch on the market.
